INVESTOR DISCOVERY PRESENTATION

STRICTLY PRIVATE & CONFIDENTIAL ©2025-26 Paddockpass.io Ltd t/a SponsorAI

Who We Are:

sponsorAI is the first social media ranking platform set to disrupt the $100B global sponsorship industry.

For the first time new & existing sponsors can quickly identify the best performing sponsorship opportunities ranked by the metrics that matter most:

- **FAN SIZE**
- **FAN ENGAGEMENT**
- **FAN GROWTH**

The Sponsorship Industry:

The $100B+ global sponsorship industry is vast and growing.

However, any meaningful research and evaluation resources for both existing & new sponsors are locked behind expensive paywalls or prohibitive PR/Agency fees.

When sponsorship performance analytics are accessible they are overly-complex, confusing, often meaningless and over-monetised.

Our Solution: **FanScore**

We've democratised sponsorship intelligence with technology that delivers clarity, simplicity and accessibility - empowering everyone, not just the privileged few.

We achieve this by generating a unique FanScore for every team, series , venue and athlete we upload to the platform.

Our live & updating FanScores aggregate complex and confusing micro-analytics, converting fan size, engagement and growth of each property we score into a simple, unique, clear & comparable metric.

FanScores quickly identify hot sponsorship opportunities for new & existing sponsors and let scored properties compare their sponsorship attractiveness against competing properties.

How Our Ranking & Scoring Delivers For Business:

Our FanScore rankings & comparisons will rapidly develop into a key industry benchmark

- Companies & brands make better and more informed decisions
- Quickly identify previously hidden opportunities
- Maximise ROI potential from marketing spend
- Hold existing partners performance to account
- Scored properties (teams, athletes & venues) validate and enhance their sponsorship value & attractiveness
- Powerful contract negotiation metric
- Attracts new companies into the sponsorship industry

How We Disrupt:

- First sponsorship comparison platform for marketing and sponsorship professionals
- First competitor comparison for teams, series, venues & athletes
- New performance & valuation methodology through rankings & comparisons
- Industry-disruptive pricing for enhanced features
- Used by both sponsors & scored properties
- Powerful resource for companies new to or curious about sponsorship
- Sticky: FanScores are live, dynamic and updated daily

How We Do It:

Built by founders with 30+ years of experience at the highest levels of the sponsorship industry, including Formula 1.

Our FanScores are dynamically generated by bespoke code & algorithms and enhanced by the computational power of selected AI platforms.

FanScore valuations are calculated on industry-accepted value metrics.

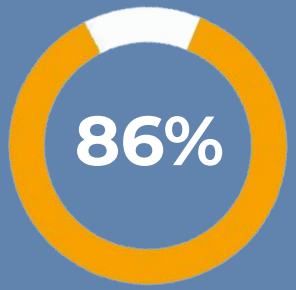
Proven Market Need

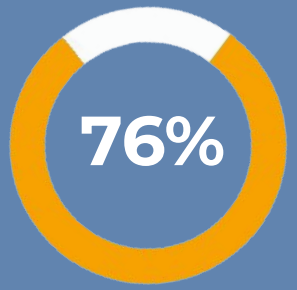
We conducted a survey within the sports community, including marketeers, professional athletes & sponsorship executives. None of the survey participants have seen this presentation nor our brand.

The results are exceeding our expectations:

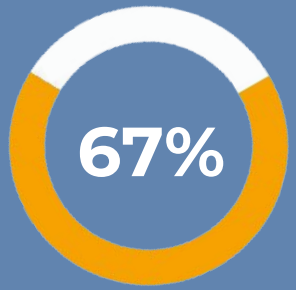


Respondents confirm the platform would be extremely or very valuable to their role

Respondents confirm they would be very likely or somewhat likely to use the platform



Respondents confirm they would be very willing or willing to pay to access the platform



Respondents confirm they would pay for access within our pricing model

Respondents confirm live, updated scores would deliver the greatest trust in the platform

** Our survey is live and ongoing. Meaningful updates will be made when available. Access to greater details of our survey are available to interested investors*

Sales We Control

Unlike our competition we have no limits on the number of properties we score and upload to the platform.

How We Convert:

- **Scored Outreach**

Each scored property is a potential customer. We reach-out to the properties we've scored, converting them to paid subscribers with a selection of powerful services & benefits.

- **Awareness Through Paid Reach**

Our paid reach budget, second only to our development budget, can be throttled up & down as we grow.
